# Aporo Web Application:

I.    Main Pages            [ no authentication ]
II.   DG Pages             [ authenticated currier ]
III.  Vendor Pages         [ authenticated vendor manager or vendor associate ]

## I.    Main Pages   [ no authentication ]

Main_Page_1 -->  Main Menu   *(see diagram 1)*

        Option 1 --> Login                                    --> directed to Main_Page_2
        Option 2 --> Registration                          --> directed to Main_Page_4
        Option 3 --> Contact Help                         --> directed to Main_Page_5

Main_Page_2 -->  Login

        Form with username, password, and "Forgot Password?" feature/link.

        User authenticated as (a) and directed to (b):

             (a)    Vendor Manager        (b)    --> Vendor_Page_1
                      Vendor Associate              --> Vendor_Page_1
                      Currier                              --> DG_Page_1

Main_Page_3 -->  "Forgot Password?"

        Form for submitting phone or email                   --> directed to Main_Page_1

Main_Page_4 --> Registration

        Option 1 --> New Currier                          --> directed to Main_Page_6
        Option 2 --> New Vendor                           --> directed to Main_Page_7
        Option 3 --> New Vendor Associate             --> directed to Main_Page_8

Main_Page_5 --> Contact Help

Display, as links, phone number and email.

Back button to return to Main_Page_1

Main_Page_6 --> New Currier Registration

Get form here[1] and post.                          --> directed to DG_Page_1

Form for posting parameters obtained by (a) and (b).

(a)     Form for obtaining the following:

| MYSQL TABLE | PARAMETER |
|---|---|
|  |  |
| app_app_user |  |
|  | first_name |
|  | last_name |
|  | addr1 |
|  | addr2 |
|  | zip |
|  | email |
|  | cell |
|  | lang |
|  | emergency_contact_name |
|  | emergency_contact_number |

This form has basic client-side validation.[2]

(b)     PhoneGap library initiated and the following parameters obtained:

| MYSQL TABLE | PARAMETER |
|---|---|
|  |  |
| app_device |  |

---

[2] Ideas for incorporating validation in Form API are much welcomed.

| | |
|---|---|
| | model |
| | platform |
| | uuid |
| | op_sys_ver |
| | battery_level |
| | lat |
| | long |
| | coord_accuracy |
| | heading |
| | speed |

Form validated server-side and error responses returned in json.  Authenticated as currier upon successful registration.

<u>Main_Page_7</u> --> New Vendor Registration

Get form here[3] and post.                              --> directed to <u>Vendor_Page_1</u>

Form for posting parameters obtained by (a) and (b).

    (a)    Form, with basic validation, for obtaining the following:

| MYSQL TABLE | PARAMETER |
|---|---|
| | |
| **app_app_user** | |
| | first_name |
| | last_name |
| | email |
| | cell |
| | lang |

    (b)    Form, with basic validation, for obtaining the following:

| MYSQL TABLE | PARAMETER |
|---|---|

---

[3] http://54.191.47.76/get_form?name=vendor_manager_registration&format=json

| | |
|---|---|
| **app_vendor** | |
| | name |
| | addr1 |
| | addr2 |
| | zip |
| | email |
| | phone |
| | other_phone |

Form validated server-side and error responses returned in json.  Authenticated as vendor manager upon successful registration.
